DETAILED ACTION

Response to Arguments

1. Applicant's election with traverse of Species I in the reply filed on 11 January 2008 is acknowledged. The traversal is on the ground(s) that the search would not be a serious burden on the examiner. This is not found persuasive because the structure is not the same.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 5 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Koichi (JP 05244690).

4. Considering claim 1, Koichi (Figure 1) teaches a piezoelectric element for transmitting and receiving ultrasonic waves (paragraph 0003); a backing load member (5) and a heat conduction material which is placed inside said backing load member (14).

5. Considering claim 2, Koichi (Figure 1) teaches a plurality of piezoelectric elements, which are arrayed in one direction, for transmitting and receiving ultrasonic waves (paragraph 0003); a backing load member (5) and one or more sheet-shaped

heat conduction materials (14) which are placed in parallel along an array direction of said piezoelectric elements and a depth direction inside said backing load member.

6. Considering claim 5, Koichi (Figure 1) teaches a heat radiating block (6) which is connected to said heat conduction material.

7. Considering claim 9, Koichi teaches the heat conduction material, any material of PGS graphite sheet with high degree of orientation where polymeric film is graphitized graphite, carbon nano-tube, aluminum nitride, boron nitride, silicon carbide, beryllium oxide, copper and aluminum is used (paragraph 0007).
